

## AXTER LIGHTNING CLIPS

**For the protection of buildings against the elements - high quality polymer clips to accommodate a lightning conductor strip.**

Axter Lightning Clips are manufactured from a high quality polymer and are extremely strong with excellent UV repellent characteristics, keeping them from fading and going brittle in sunlight. They will suit most standard membranes.

The Lightning Clips are simple to use. They are supplied as a one-piece product without any screw attachment and will accommodate a **conductor strip 25 mm wide by 5mm thick.**

The fixing rivet is recessed into the underside of the clip to avoid any damage to the membrane.

A generous flange measuring 100 mm x 100 mm enables the Clip to be secured to the membrane.
